

Environment and Sustainability

Document No: N-10500-PL1937 A742838

Date: 10/09/2020

General Policy Objectives

The National Offshore Petroleum Safety and Environmental Management Authority (NOPSEMA) is committed to environmental protection as a core tenet of our business. We also believe that we have a key role to play in implementing Australian government expectations on managing climate and disaster risk; and that reducing the environmental impact of our own operations is an important part of our corporate responsibility.

Our objective is to conduct our activities in an environmentally responsible manner that enhances our reputation and fosters the confidence of the community, industry and the domestic and international regulatory networks that we operate within.

Policy Statement

NOPSEMA is committed to reducing the impacts of our operations on the environment. NOPSEMA also strives, through a process of continuous improvement, to understand opportunities to further reduce impacts through all aspects of our activities. This will be achieved by:

- Implementing and maintaining an environmental management plan that ensures the systematic management of the environmental footprint of NOPSEMA's operations; and
- Setting and regularly reviewing environmental management strategies, objectives and targets, and increasing awareness of environmental management across the organisation.
- Our goal is to minimise our environmental footprint. We will achieve this by:
- Identifying and managing environmental impacts through regular review of the environmental aspects of our operations.
- Complying with applicable legislative requirements and Australian government expectations, while aspiring to higher standards and understanding the global societal context.
- Ongoing consultation and communication with the workforce on environmental management matters, leveraging the significant in-house expertise.
- Seeking external advice and best practice examples, and fostering a culture of continuous improvement.
- Monitoring and evaluating NOPSEMA's environmental performance, and periodically reviewing and updating the actions taken to reduce our footprint.

Stuart Smith
