Governance

## Independent and Professional

- *Transparent, coherent policies and processes, shared with industry and consistent with the requirements of the regulations, administered by a critical mass of skilled professionals that focus on ensuring dutyholders, and the regulator, comply with their obligations specified in law*

## Respect for “due process”

- *Timely and competent decisions based on criteria set out in the regulations*
- *Processes outside the regulatory requirements are not created*
- *Requirements and interventions by the regulator are not arbitrary*

## Certainty for industry and a reduction in regulatory burden

## Ongoing dialogue
