

## OHS IMPROVEMENT NOTICE

To: Subsea 7 Australia Contracting Pty Ltd

In conducting an OHS inspection in relation to the Seven Eagle facility, I [REDACTED], a NOPSEMA inspector appointed under section 602 of the Act, am satisfied on reasonable grounds that the person named above as the responsible person is contravening, or has contravened and is likely to contravene again:

- (a) Clause 9(2)(c) of Schedule 3 to the Act;

*“to take all reasonably practicable steps to ensure that any plant, equipment, materials and substances at the facility are safe and without risk to health;”*

at:

Seven Eagle.

The reasons for my opinion are:

During a planned inspection for the Seven Eagle facility, the operator could not demonstrate that it had reasonably ensured that the design, construction, and installation of equipment and arrangements for towing the Self-Propelled Hyperbaric Lifeboat (SPHL) will protect the safety of the divers. In particular, there is no evidence that the mooring cleat attached to the bow of the lifeboat is designed and verified fit for towing purposes.

As a result of this contravention I am satisfied that there is, or may be, the following risk to the health or safety of any person:

- Failure to evacuate saturations divers to a place of safety in the event of an emergency.

You are required to take action within **45** days of the date of this notice to prevent or reduce the risk.

The following action must be taken by the responsible person within the period specified above:

- Demonstrate, by providing appropriate documentation of independent verification, that the design, construction and installation of equipment and arrangements for towing the SPHL is fit for function and use, and will protect the safety of divers; or
- Comply with Clause 9(2)(c) by any other suitable means as required to reduce risk to a level that is as low as reasonably practicable.

**Signed:**

[REDACTED]
