Dear 

Barossa Gas Export Pipeline Installation Environment Plan (BAA-100 0329) (Pipeline EP)

We refer to:

- the letter from the EDO to NOPSEMA, copied to Santos, dated 15 December 2022 (**EDO Letter**);
- the inspection carried out by NOPSEMA on 21 December 2022 (**Inspection**); and
- the exit brief by NOPSEMA in relation to this inspection given on 22 December 2022 (**Exit Brief**).

We thank NOPSEMA for its engagement in relation to the EDO Letter and for its Observations in the Inspection and Exit Brief.

Santos has determined to undertake its Management of Change Assessment (MOC) in relation to the information provided in the EDO Letter and its enclosures. Santos undertakes not to commence pipeline construction until the MOC has been completed, and NOPSEMA has inspected, notwithstanding any delay to Santos' scheduled commencement of activities under the Pipeline EP.

Yours sincerely
