Description of Event

Dislodgement and loss of single plastic pipe bundle spacer to the marine environment from existing subsea infrastructure during sediment relocation. in preparation for decommissioning activities.

Immediate Actions Taken

Attempt to recover considered however, could not be reached from the vessel and sea conditions were not amenable to launch fast rescue craft. Personnel safety and practicability assessment was undertaken, decision made that the safety risk to personnel was significantly higher to attempt recovery than the environmental impact of the bundle spacer lost to the marine environment. Recovery was deemed to not be practicable.

Environmental Impact

Environment Type/Impact	Severity	Cost
Environmental Actual Impact - 06 Waste Event	F - Actual Environmental Impact (includes no impact)	AUD

Investigation Findings

In line with Woodside Health & Safety and Environmental Policies, this investigation was conducted on the basis that all incidents are preventable and the purpose of the investigation was to fully understand the causes of this incident so that we can improve the risk management systems currently in place to facilitate preventing all incidents.

Conditions & Factors For Involved Items

Involved Item: 06 Waste Event. Involved Item Type: Involved Environment. C&F Form: Environment Impact Details. (Status: Finalised)

Select Environmental Impact to complete the form for that impact type	06 Waste Event
Details of Impact e.g. "Noise complaint from local resident", "Damage to a heritage site", "Accidental release of hazardous waste"	spacer lost to ocean

Involved Item: WELEV25010052. Involved Item Type: Event. C&F Form: Supporting Details Form - GSR. (Status: Finalised)

Were any of the Foundations related No

to a causal or contributing factor?

Was the event related to other GSRs?

No
