

Recordable Environmental Incident Monthly Report

Document No: N-03300-FM0928 A198750

Date: 15/01/2025

Due Date: By the 15th day of the following month.

Send completed form to: submissions@nopsema.gov.au via secure file transfer at <https://securefile.nopsema.gov.au/filedrop/submissions>

Reference: Regulation 26B

Please check the following boxes if applicable to this report			Nil Incident Report: <input type="checkbox"/>			Final report for this activity: <input checked="" type="checkbox"/>		
Titleholder name:	Woodside Energy Scarborough Pty Ltd	Titleholder business address:	Mia Yellagonga, 11 Mount St Perth WA 6000	Title of environment plan for the activity:	Scarborough Seabed Intervention and Trunkline Installation Environment Plan			
Activity type: (e.g. drilling, seismic, production)	Construction and installation of a facility Other survey	Month, Year:	December 2024	Facility name and type : (e.g. MODU, Seismic Vessel, FPSO)	Scarborough Trunkline			
Contact person:		Email:	@woodside.com	Phone:				
Incident date	All material facts and circumstances (including release volumes to environment if applicable)	Performance outcome(s) and/or standard(s) breached	Action taken to avoid or mitigate any adverse environmental impacts of the incident	Corrective action taken, or proposed, to stop, control or remedy this incident	Action taken, or proposed, to prevent a similar incident occurring in future			

15/12/2024	<p>As required by the <i>National Greenhouse and Energy Reporting Act 2007</i>, contractors must report GHG emissions if they reach threshold levels related to fuel and energy usage during the financial year, under the NGER Scheme (reporting to be submitted to the Clean Energy Regulator by 31 October).</p> <p>Fuel usage over the reporting period, recorded by Saipem for the Castorone was ~14,471MT (excluding Dec 2023) which is approx. ~42,000t CO₂-e and exceeds the 25,000t or more of CO₂-e threshold for a facility (assumes that Castorone meets definition of a facility).</p> <p>Saipem did not report emissions under the NGER Scheme for the Castorone for the 2023/24 period (or activities more broadly, if triggered) by the 31 October due date.</p>	PS 5.2 - GHG emissions reported as per regulatory requirements.	No adverse environmental impact (actual or potential).	<p>Woodside engaged with Saipem throughout the 12 months of the reporting period to understand the contractor's intent and capability for reporting, with no commitment made by contractor that NGRS reporting would take place.</p> <p>Prior to due date, Contractor indicated they did not believe reporting was required, however did not provide a verifiable reason for non-reporting.</p> <p>After the reporting deadline had passed, Woodside continued to communicate reporting requirements to contractor, including sending contractor calculations which showed Castorone had exceeded NGRS reporting threshold, and asking contractor to provide just cause for failure to report (i.e. is there evidence that Castorone / Saipem activities did not classify as a Facility).</p>	<p>At the time of this MRIR, NGRS reporting by Saipem had not been carried out.</p> <p>Saipem recently stated that they plan to report and are engaging the Clean Energy Regulator.</p>

Note 1: As at 28 February 2014, amendments to the Offshore Petroleum and Greenhouse Gas Storage (Environment) Regulations changed from environmental performance objective to environmental performance outcome. If you are reporting against an EP accepted under the old Regulations please report against the environmental performance objective for that activity.

Note 2: This form may be submitted in conjunction with the 'Injuries and Fatalities – Monthly Summary Report' Form available at www.nopsema.gov.au
