[1] Effective 12 June 2025, notifiable incidents formerly published as 'OHS – damage to safety-critical equipment' have been reclassified to 'OHS - failure of control measures critical to safety'. This is in line with the 2024 revision of the Safety Regulations which now specify that operators need to notify NOPSEMA of damage, loss or removal of technical or other control measures that have been identified as critical to safety. Further guidance is available on the NOPSEMA website.

[2] Notification, reporting and recording requirements for titleholders in relation to WI incidents came into effect on 1 January 2016 through amendments to Part 5 of the Offshore Petroleum and Greenhouse Gas Storage (Resource Management and Administration) Regulations 2011. Consequently, as of Q1 2016, NOPSEMA has commenced publishing WI incident data as a category in its own right.

[3] Number of environment reportable incidents notified to NOPSEMA identified as matters protected under Part 3 of the EPBC Act. Note that these figures are a subset of the total number of reportable incidents shown in the line above.
